Combining Cannabis & Wine We design our menus to offer a comfortable and gently elevated experience to enhance your senses and enjoyment, so many of our cannabis offerings are low dose and even non-psychoactive. That said, cannabis can amplify the effect of alcohol and vice versa. The pro-move is to invibe before you imbibe, and to take it low and slow. If at any point you begin to feel too high or uncomfortable in any way, ask one of your hosts for a dose of our Therapeutic CBD tincture which will quickly counteract the psychoactive effects of THC.
